David Epner  
President  
Epner Technology  
279 Frost Street  
Brooklyn, NY  
11222 USA

Dear Mr. Epner,

On behalf of Raytheon Precision Manufacturing (RPM) and the Multi-Mission – High Energy Laser (MM-HEL) program, I would like to express my sincere gratitude and appreciation to the entire Epner Technology team for successfully delivering over 45 gold plated part numbers in support of MM-HEL. Your team's hard work and dedication allowed RPM, and ultimately Raytheon Technologies (RTX), to meet a critical customer milestone. At the end of July we were able to successfully demo the product to the MM-HEL customer which keeps RTX in the running for possible future contract awards.

Without the dedication of the entire Epner Technology team, including supporting multiple teleconferences, meetings, and working overtime, RPM would not have been able to meet this critical milestone. We are grateful for your relentless efforts and look forward to continuing our partnership into the future.

Best regards,

Don Clemens  
General Manager  
Raytheon Precision Manufacturing
