LABORATORY TEST RESULTS

JOB # 6579MP
Date: 11/11/2020

Prepared For: Epner Technology

Subject: Spot Reflectance Testing

Test Methods

A reflectance measurement was performed using a CARY 5000 Spectrophotometer at 1060 nm. Due to the structured nature of these samples, measurements were performed at 4 phi orientations and the results averaged.

Measurements were made in standard ambient temperature and humidity lab conditions. Samples were measured in an **as received** condition. The samples were not cleaned prior to measurement. For the description of the samples, please refer to measurement matrix.

Results:

GT Number	Sample ID	% Reflectance (1060nm)
GT2458	Serial Number 3	99.52
GT2459	Serial Number 4	98.47
GT2460	Serial Number 5	97.97
GT2461	Serial Number 7	99.23
GT2462	Serial Number 9	97.41
GT2463	Serial Number 10	96.72
GT2464	Serial Number 13	99.25
GT2465	Serial Number 14	97.57
GT2466	Serial Number 17	97.18
